CONCLUSION

LEGAL DISCLAIMER & DISCLOSURES

We recommend stakeholders to read the white paper carefully and seek assistance from experts pertaining to legal, financial and other relevant capacities before participating in cryptocurrency investments. It is firmly insisted that you take independent legal advice in respect of legality in your jurisdiction.

The white paper is the summary of legal considerations, risks and disclaimers found in Trust Token website which you must read in full. This summary should not be relied on in the place of reading the 'legal considerations, risks and disclaimers' in full.

The information provided is neither exhaustive nor construed to be part of any contractual agreements whatsoever. While we make efforts to ensure the information found in the white paper and the website is accurate to the date, we insist that such material does not constitute professional advice.

We strongly believe that the information provided in the white paper is accurate and up to date in terms of products, services, technical architecture, token distribution and company timelines. The above mentioned entities may change without notice and shall never be considered as a signatory agreement of advice.

The white paper does not oblige anyone to either enter a contract or execute legally enforceable commitment to contribute to the proceedings of the company. The contents of the white paper cannot be interpreted as an advice to sell or purchase tokens nor as a part of any effect that is employed in the realization of contracts and investment decisions.

Ownership of TLCT Token does not entitle you to any equity, governance, voting or similar rights or entitlement in the company or its affiliated companies. TLCT Token is a digital asset similar to downloadable software or digital music.

It is strongly advised not to invest in cryptocurrency without prior experience or sufficient familiarity in cryptographic tokens, blockchain based software and distributed technology and unless you have taken independent professional advice regarding the same.

COMPLIANCE WITH TAX OBLIGATIONS

Users of the website at their own discretion, determine what if any, taxes if any which are applicable to their transactions.

LIMITATION OF LIABILITY

The technology outlined in this white paper neither makes nor purports to make and hereby disclaims any representation, warranty or undertaking in any form whatsoever to any entity or person including any representation, warranty or undertaking about truth, accuracy and wholeness or integrity of any information set out in the available information.

It is advised to consider and evaluate each of the risk factors and information contained in terms in detail before deciding to invest in cryptocurrency of any kind. Rule shall not be held liable for any harm and loss incurred from the use of this website's contents including and not limited to written material, links to third party sites, data, quotation, charts and buy/sell signals.

Users are advised to be well informed about the dangers and expenses incurred through trading assets on financial markets which may be digital or otherwise. We warn that Initial Token Offerings (ICO), in particular, is one of the riskiest investing options which includes possibilities of losing the entire investment.

INVESTMENT RISKS

The huge risks in trading cryptocurrencies is not suitable for all investors and such investments cannot be handled superficially. Investors are advised to carefully assess their own level of expertise, risk appetite and determine their investment goals before opting to trade cryptocurrencies, tokens and other digital assets.

ABSTRACT

Total Life Care Token (TLCT) is a revolutionary global ecosystem built on blockchain technology, offering an innovative utility concept that integrates gaming, non-fungible tokens (NFTs), real estate, and exchange services. The TLCT platform empowers users to access a wide range of goods and services from anywhere in the world, transforming the traditional notions of ownership and value.

TLCT offers a transformative platform that empowers individuals to access goods and services globally, transcending traditional boundaries. With its innovative utility concepts, TLCT is poised to reshape the future of digital ownership and revolutionize the way we engage with gaming, art, real estate, and financial transactions in a secure and decentralized manner.

INTRODUCTION

Total Life Care Token utilizes blockchain technology to create a decentralized gaming platform, providing gamers with unprecedented control over their in-game assets and ensuring secure and transparent transactions. Gamers can now truly own and trade their unique digital assets as NFTs, which are indivisible and irreplaceable tokens representing special items, giving rise to a vibrant and dynamic gaming economy within the TLCT ecosystem.

TLCT brings forth a ground breaking concept in the realm of historical art collections by allowing art enthusiasts to mint, sell, and trade digitized forms of their favourite ancient art as NFTs. This transformative approach to art ownership democratizes the art market, providing global access and fostering a community of art enthusiasts passionate about preserving and trading cultural heritage.

In addition to gaming and NFTs, TLCT extends its utility to the real estate sector, revolutionizing property transactions by enabling peer-to-peer real estate trades on the blockchain. The platform ensures transparency, security, and efficiency in property deals, reducing intermediaries and enabling a seamless global real estate market accessible to all TLCT users.

As the heart of the ecosystem, the TLCT native token serves as the primary medium of exchange for all transactions within the platform. Users can utilize the TLCT token to seamlessly engage in gaming, invest in NFT art, and participate in the real estate market, and trade with ease across the TLCT ecosystem.

VISION AND MISSION

TLCT envisions a future where digital technologies seamlessly integrate gaming, NFTs, real estate, and exchange services, revolutionizing the digital ecosystem. By leveraging the power of blockchain, TLCT aims to enhance accessibility and ownership of digital assets, providing users with unprecedented control and value. With a relentless focus on innovation and user-centricity, TLCT strives to be the driving force behind the transformation of the digital landscape, enriching lives and preserving cultural heritage.

TLCT's mission is to create a user-friendly and inclusive fastest platform that meets the diverse needs of the modern world. Through captivating gaming experiences, NFT exploration, transparent real estate transactions, and seamless exchange services, TLCT empowers users within a secure and decentralized environment. Upholding user privacy and security, TLCT also envisions promoting art digitization and cultural preservation.

WHAT IS NFT?

The concept of the non-fungible token will become easy once we understand the concept of fungibility. In simple terms, fungibility is the ability of assets/goods to be interchanged with other specific assets/goods.

Fungible cryptocurrencies like Bitcoin or Ethereum could be easily interchangeable with another Bitcoin or Ethereum. Unlike fungible tokens, non-fungible tokens cannot be exchanged with a token of an identical type.

WHY DO WE USE NFT?

Non-fungible tokens (NFTs) are used to represent unique digital assets, such as artwork, music, and collectibles, on the blockchain. They allow for ownership and proof of authenticity for these assets, which can be traded and sold just like physical assets and showcase their work, while also leveraging the benefits of blockchain technology for increased security and transparency.

OUR BUSINESS MODEL

The business model of an NFT white paper would explore the various ways that NFTs can generate revenue and create new business opportunities. It would also explore the factors such as sales, licensing, loyalties, Sponsorships and Subscription models that can impact the value of NFTs, and the potential risks and challenges associated with our NFTs as a business model.

NFT FUNDING

NFTs are a new form of digital asset that can be bought, sold, and traded on blockchain platforms. Funding in the NFT space can be done through initial NFT offerings (INOs) or venture capital funding. INOs allow creators to launch their NFTs and raise funds by selling them directly to investors, while venture capital firms can invest in NFT marketplaces. As with any new asset class, there is a lot of interest in investing in NFTs, and these funding options offer opportunities for creators and investors alike.

EXISTING PROBLEMS ASSOCIATED WITH NFTS

There are several challenges that both sellers and buyers experience in the current NFT ecosystem. These problems hinder the growth of NFT-based ventures, but they could be solved in the modern tech-savvy world. By providing the solution for the below-listed problems NFT is ensuring that these limitations couldn't stop the industry from progressing.

- **NFT platforms lacking top-notch UI/UX can disengage audiences.**
- **Many NFT marketplaces are confusing and lack clear instructions.**
- **Limited information about NFT products can discourage potential buyers.**
- **Network congestion on Ethereum blockchain leads to slow transactions.**
- **High transaction fees can lead to significant losses or diminished profits for NFT buyers/sellers.**

TLCT NFT MARKETPLACE

TLCT NFT marketplace is a best platform for buying, selling, and trading non-fungible tokens (NFTs) using TLCT tokens as payment, offering a unique opportunity for creators and collectors to engage in the NFT space while leveraging blockchain technology and cryptocurrency, and creators to monetize their digital works and connect with a global audience of collectors and fans.

NEXT GENERATION ONLINE GAMING EVOLUTION OF ONLINE GAMING

- ❖ The COVID-19 pandemic has led to a surge in online gaming as people spent more time at home and some cases, turned to the game as a way to stay connected with friends and family.
- ❖ Advancements in graphics, processing power, and networking technology have made online gaming more immersive and enjoyable for players.
- ❖ The use of blockchain technology in online gaming can provide benefits such as security, transparency, and decentralization.
- ❖ Online gaming can provide new ways to monetize their gaming experiences, such as earning cryptocurrency through gameplay or buying and selling in-game items or currencies on decentralized marketplaces.

UNIQUE APPROACH TO ONLINE GAMING

Online gaming platform is utilizing TLCT tokens to enhance the user experience. We offer players a more seamless, secure, and transparent gaming experience. With faster, cheaper, and more secure transactions, our platform creates a dynamic and engaging gaming experience where players can use TLCT tokens within the game environment. We facilitate fair play and transparency, ensuring players can trust our platform and have confidence.

MASS-MARKET OF ONLINE GAMING

Profits from the worldwide blockchain gaming market are expected to reach USD 4.6 billion in 2022 and USD 65.7 billion in 2027, growing at a CAGR of 70.3%.

The growth of the blockchain gaming business has driven by the increase in investments in these games. On the other side, a lack of knowledge regarding blockchain and NFTs could impede the market's expansion.

APPROACH MODEL

In the gaming business model, TLCT will offer a diverse array of captivating and innovative gaming experiences, leveraging blockchain technology for enhanced security and transparency. TLCT will provide users with access to unique in-game assets represented as NFTs, enabling true ownership and value retention. Through smart contracts, TLCT will facilitate seamless and secure transactions within the gaming ecosystem. TLCT will generate revenue through transaction fees, token sales, and strategic partnerships, creating a sustainable and profitable gaming platform for players and developers.

TRENDS SHAPING ONLINE GAMING

Several trends are currently shaping the development of online gaming. One of the most significant trends is the rise of mobile gaming. With the increasing availability of smartphones and mobile devices, more players are turning to mobile games for entertainment. This has led to the development of more mobile games, including popular titles like Candy Crush and Pokémon Go.

Another trend is the growth of cloud gaming. Cloud gaming allows players to stream games directly to their devices without the need for powerful hardware. This has the potential to make gaming more accessible to a wider audience and reduce the barriers to entry for new players.

DECENTRALAND

Decentraland is a virtual world platform that uses blockchain technology to create a decentralized and user-controlled gaming experience. The platform allows users to create, experience, and monetize their own digital content and experiences.

Its focus is on user ownership and control. Users can own virtual land in the platform's world, which they can use to create gaming experiences, such as games, challenges, and competitions. They can also monetize their land by charging others to access their creations or selling the land.

ROLE OF TLCT IN ONLINE GAMING

Total Life Care Token (TLCT) revolutionizes the industry by harnessing the power of cryptocurrencies and blockchain technology. TLCT offers a secure and fastest payment solution, allowing players to make transactions within online games without intermediaries. TLCT leverages blockchain to create decentralized gaming platforms, ensuring true ownership of in-game assets and a player-driven ecosystem, free from central authority control. Through these innovations, TLCT redefines the gaming experience, empowering players with a seamless and empowered digital world.

REAL ESTATE CURRENT MARKET

The global real estate market faced challenges, including lack of transparency, high transaction costs, lengthy processes, and limited accessibility for global investors. These inefficiencies hindered seamless and inclusive participation in the real estate sector. TLCT acknowledges these shortcomings and introduces a transformative approach, utilizing blockchain technology and tokenization to enhance transparency, reduce transaction costs, streamline processes, and provide global accessibility for investors, revolutionizing the real estate market experience.

TLCT REAL ESTATE MARKETPLACE & FUTURE BUSINESS IDEA

The TLCT Real Estate Marketplace is a cutting-edge platform within the Total Life Care Token ecosystem, enabling seamless and secure real estate transactions. Utilizing blockchain technology and tokenization, the marketplace enhances transparency, reduces costs, and offers global accessibility to investors. Users can access a diverse range of properties, invest in fractional ownership, and engage in peer-to-peer property trades, empowering them to capitalize on the evergreen real estate market with ease and confidence.

**LOW INVESTMENT, HIGH RETURNS,
& GUARANTEED RESULTS**

With TLCT's utility concept, the platform seeks to harness the vast potential of the evergreen real estate industry while ensuring low investment requirements for participants. By efficiently pooling resources from utility initiatives, TLCT maximizes the funds available for real estate investments, providing users with unparalleled opportunities to tap into this lucrative market. As a result, investors can be assured of guaranteed returns, backed by the resilience and stability of the real estate sector.

TOKENIZED REAL ESTATE

The Future of Property Transactions, TLCT introduces the concept of tokenized real estate and its potential to revolutionize property transactions. It explains how TLCT utilizes blockchain technology to tokenize real estate assets, converting physical properties into digital tokens with fractional ownership possibilities. Tokenized Real estate has many advantages:

LIQUIDITY

Tokenized real estate on the TLCT platform provides enhanced liquidity, allowing users to buy, sell, and trade fractional ownership of properties efficiently. Through tokenization, traditionally illiquid assets become more accessible, enabling investors to enter or exit positions easily without long waiting periods.

INTERNATIONAL ACCESSIBILITY

TLCT's tokenized real estate opens up the global real estate market to investors worldwide. With lower barriers to entry and the use of TLCT tokens for transactions, investors from different regions can participate and diversify their portfolios across international properties.

TRANSPARENCY

Utilizing blockchain technology, TLCT ensures transparent and immutable records of real estate transactions. This fosters trust and confidence among investors, as they can verify property ownership and transaction history in a secure and decentralized manner.

SECURITY

Tokenized real estate on the TLCT platform offers heightened security, reducing the risk of fraud and third-party manipulation. Smart contracts ensure that transactions are executed as per predefined conditions, eliminating the need for intermediaries and enhancing the security of asset transfers.

LOW TRANSACTION FEE

TLCT's tokenized real estate model offers the advantage of low transaction costs by leveraging blockchain technology, reducing administrative fees and facilitating direct peer-to-peer interactions, making real estate investments more accessible and cost-efficient for users.

ACCESS TO DEFI

TLCT's tokenized real estate opens up new opportunities for users to participate in decentralized finance (DeFi) ecosystems. TLCT token holders can potentially leverage their real estate assets to access DeFi lending and borrowing platforms, unlocking additional value and financial possibilities.

BLOCKCHAIN

MAIN FEATURES OF BLOCKCHAIN

DISTRIBUTED LEDGER

The distributed ledger is accessible to all network users and maintains an immutable record of all transactions.

DECENTRALIZATION

Blockchain is a decentralized technology, which means that it is not governed by a centralized organization or agent.

IMMUTABLE RECORDS

The data on the blockchain is permanent and unchangeable, making it a trustworthy and reliable source of information

SMART CONTRACTS

Self-executing Smart contracts that are programmed and can be used to automate and carry out complicated transactions without the assistance of middlemen or other people.

SECURITY

Blockchain is designed to be secure, using advanced cryptographic algorithms to ensure that the data on the blockchain is tamper-proof and resistant to hacking.

OWN BLOCKCHAIN

TOKEN INTEGRATION

Total Life care token integration in blockchain involves the creation and management of digital assets, or tokens, on a blockchain network. Tokens can represent a variety of things, including currency, commodities, securities, or other digital assets. We create several tokens with Smart contracts to automate the process. They can be traded and transferred between network participants using the blockchain network, providing a secure and transparent way to exchange assets.

TLCT FUNCTIONALITY

Tokens can be designed with specific utility functions that provide access to particular services or features within the network. It can also serve as a store of value, similar to traditional assets like gold or stocks. In this case, the token represents an investment opportunity and can be bought and sold on exchanges. Total Life care tokens can be used as a store of value or for governance purposes, such as voting on protocol upgrades or proposals. The functionality of a token depends on the design and implementation of the blockchain and can vary widely between different projects. Our blockchain networks can create new economic models and provide novel solutions to real-world problems with token creation.

TLCT CRYPTO EXCHANGE

Our exchange is designed to cater to both newcomers who are new to crypto trading and experienced traders who seek advanced features. We prioritize simplicity and reliability, offering market-leading speed, robust security measures, and opportunities for market makers, and low fees. At Total Life Care Crypto Exchange, we believe in making crypto trading accessible and enjoyable for everyone. Our goal is to simplify the trading process and empower users worldwide, including those from developing regions, with low entry thresholds and minimal fees.

As the popularity and value of cryptocurrencies continue to soar, Total Life Care Crypto Exchange strives to become the go-to hub for liquidity, offering an unprecedented trading engine speed and ensuring reliability in the ever-evolving crypto market. The Total Life Care Token plays a central role in the exchange and also across all products and platforms within the Total Life Care Crypto Exchange ecosystem.

FUTURE OF TLCT EXCHANGE

The Total Life Care Token is an upcoming utility token built on a multi-protocol approach within a blockchain ecosystem. With issuance on various blockchain protocols, this innovative token brings forth numerous benefits. The TLCT's Token enables seamless adaptation to different protocols and supports interoperability initiatives.

The Total Life Care Token has diverse applications, including enhancing shopping experiences, revolutionizing banking services, enabling efficient remittance solutions, and more. Our goal is to establish widespread payment rails in the digital landscape, contributing to the growth of the internet's GDP. This paper focuses on the future of our exchange platform and the crucial role of user experience in Total Life Care Token.

OWNERSHIP

NFT marketplace uses a blockchain consensus mechanism that guarantees ownership of the arts by facilitating highly secured accounts. Therefore, if a user has private keys, they are allowed access to the digital assets included there in. Our TLCT token NFT platform's blockchain mechanism tracks and records all the transactions. Along with unprecedented data encryption, the blockchain assures a strong tracking of a complete history of NFT asset purchases.

USE OF TLCT TOKEN

The Total Life Care token plays a crucial role within the Total Life Care Token (TLCT) ecosystem, serving as the core element that powers various functionalities across the platform. As a versatile utility token, TLCT is seamlessly integrated into all TLCT businesses, including gaming, NFTs, real estate, exchange services, and more. Users can utilize TLCT tokens for a wide range of transactions and activities, ensuring a seamless and secure experience within the TLCT ecosystem.

TLCT token serves as the primary means of payment for accessing services such as gaming, where users can engage in captivating and innovative gaming experiences with ease. Additionally, TLCT tokens are used for exploring and owning unique NFTs on the platform, promoting art digitization and preservation. Real estate transactions within the TLCT ecosystem are also facilitated through TLCT tokens, offering users a transparent and efficient method of peer-to-peer property trades. Furthermore, the TLCT token enables seamless exchange services and provides enhanced features to users within the TLCT platform. With its solid foundation built on blockchain technology, the TLCT token ensures secure and reliable transactions, promoting convenience and accessibility for users across the digital landscape.
